

## PRESS RELEASE

FOR IMMEDIATE RELEASE

### **P&R Dental Strategies Receives Standardized Control Assessment (SCA) Certification, Meeting Strict Information Security Standards**

**Certification demonstrates to the dental industry that P&R Dental Strategies meets the highest data security standards and manages a state-of-the-art IT infrastructure.**

HAMILTON, NJ, Sept. 10, 2019 -- P&R Dental Strategies, LLC, the premier dental insights company delivering customized, actionable business intelligence to support a variety of dental payer objectives, today announced that after being assessed by ControlCase, LLC, a leading provider of IT Security Certifications and Continuous Compliance Services, its operations have been found to be in compliance with the latest version of Shared Assessments' Standardized Control Assessment (SCA) security rules. As a result, P&R Dental Strategies has received the formal SFG Shared Assessment Certification Notice, effective August 7, 2019. Shared Assessments is a trusted, third-party security assessment firm and an authority on data and information security. A rigorous set of onsite assessments of the cybersecurity, IT, privacy, data security and business resiliency capabilities of P&R Dental Strategies was completed in August of 2019.

The SCA is an objective, third-party look at critical risk control areas and is used as a self-assessment tool of an organization's information security controls. By passing this assessment, P&R Dental Strategies demonstrates to its partners, clients and industry peers that its information security program meets the highest IT and privacy standards.

Paul T. Sheils, CEO of P&R Dental Strategies, said "This prestigious achievement demonstrates to our industry partners that data security and meeting the highest privacy standards are among P&R Dental Strategies' top priorities. Coupled with our HITRUST CSF certification for our Dental Claim Review Management System, the SCA Control Validation is another shining example of our commitment to the highest standards of excellence in healthcare informatics technology, privacy and security standards."

Tracy Sproule, Compliance Officer at P&R Dental Strategies, said "Ongoing Compliance with the strict security regulations in the healthcare industry requires constant attention and diligence from every department in the company. This SCA Certification from Shared Assessments places us among a very elite group of companies that have achieved multiple security certifications, and is a testament to the hard work and rigorous privacy and security measures our team implements every day."

Kishor Vaswani, CEO of ControlCase, said “Leaks, vulnerabilities and data breaches have emerged as a few of the most urgent and consequential cybersecurity challenges. Such incidents have the potential to cost millions of dollars and represent an existential risk to many companies. Shared Assessments provides a practical framework to effectively assess an organization's strategic, operations or reputational risks. Additionally, the assessment validates the responses that an organization is providing to their customers and other third parties.”
